About Finova

Finova Solutions is a tech company building secure, scalable, and intelligent systems for modern businesses. Founded in 2025, our team delivers practical AI solutions that automate work, improve decisions, and optimises operations across Pakistan, the Middle East, Africa, and global emerging markets.

“AWAAZ”

Human-like, multilingual conversational voice AI agents that deliver instant, natural support — anytime, anywhere.

“NovaAUTH”

Smart automation that anticipates needs, resolves issues instantly, and transforms operations for peak efficiency.

CUSTOM TECH SOLUTIONS

Tailored tools that integrate seamlessly into workflows, enhancing customer journeys and boosting performance

Leadership

Astafa Ali, Founder and Chief Executive Officer of Finova Solutions, leads the company with a clear vision: to make advanced AI and intelligent automation accessible to every business. With his direction, Finova has grown from a small engineering team into a global solutions partner delivering AI-driven systems across aviation, fintech, retail, and international markets. His leadership emphasizes practical innovation, ethical technology, and measurable business impact.

Vision and Mission

VISION

To redefine the future of customer engagement through ethical, intelligent AI creating seamless, human-like experiences that empower businesses and enrich lives.

MISSION

To empower businesses through intelligent automation and powerful software solutions. We combine AI with custom engineering to streamline operations, improve efficiency, and unlock lasting business value.

Finova's Story

Foundation:

Finova Solutions is founded with the goal of bridging AI innovation with real-world business challenges.

Growth:

- Team expanded to 12; launched Awaaz and NovaAUTH.
- Delivered real-world deployments across ERP automation, aviation workflows, and computer-vision solutions.
- Built a full mobile application with a West African partner; ran AI pilots with JazzCash to optimize CSR initiatives.

Regional Expansion:

- Partnership with AdvanzaTech Dubai for Awaaz deployment in GCC.
- Scaling enterprise-grade AI and automation solutions.
- Partnership with Sirius Solutions to deploy Finova smart enterprise systems in the US market.

Core Values

Innovation

We build solutions that move businesses forward.

Integrity

Transparency and ethical engineering guide everything we do.

Security First

We design every system with protection, compliance, and trust in mind.

Reliability

Our products and platforms perform consistently at scale.

Client-Centricity

We solve real problems through close collaboration.

Continuous Learning

Our team grows with the technologies we build.

What We Do

Finova delivers intelligent digital systems that help organizations automate workflows, improve decision-making, and scale secure, high-performance technology.

AI & Machine Learning:

Conversational AI, predictive analytics, and computer vision solutions designed to enhance automation, insight generation, and real-time intelligence.

Full-Stack Development:

End-to-end development of web platforms, mobile applications, and enterprise dashboards built for performance, usability, and scalability.

DevOps & Cloud Engineering:

Cloud-native architectures with Kubernetes, CI/CD pipelines, monitoring, and deployment strategies that ensure reliability and rapid iteration.

What We Do (Contd.)

Enterprise IT Systems:

Custom ERP modules, workflow automation, and operational systems that streamline processes and improve organizational efficiency.

IoT & Edge Computing:

Device telemetry, sensor-driven intelligence, and real-time data processing for monitoring, automation, and decision support.

Web3 & Blockchain Engineering:

Decentralized applications, smart contracts, and blockchain-based systems using Web3 technologies for secure and transparent digital solutions.

PRODUCT OVERVIEW

Our solutions combine AI, automation, and enterprise engineering to help organizations scale with confidence.

Products Include:

- Awaaz – Conversational Voice AI
- NovaAUTH – Biometric Authentication Layer
- AI Powered CRM
- Smart Enterprise Systems
- Warzish (Under Development)

What Our Products Enable:

- Faster customer interactions with multilingual automation
- Secure and seamless authentication across platforms
- Improved lead conversion through intelligent workflows
- Tailored enterprise modules that adapt to business needs

“Awaaz”

PKR 25–30

Cost per agent-handled
call every minute

35%

year on year Growth
in fraud losses

20%

Call abandonment
rate

01

Long Wait Times Drive Frustration

Customers wait over 8 minutes on average, leading to 20% call abandonment and low CSAT scores

02

Fraud is Rising Rapidly

Due to the increasing Fraud and scam losses, Customer support faces heavy call traffic.

03

Language Barriers Limit Access

While 40% of Pakistanis speak regional languages, many struggle with mono-accent Urdu/English IVRs.

04

Lost Revenue Opportunities

Human agents lack bandwidth to upsell, only 5% of calls promote services, leaving PKR 2.5B in annual revenue.

05

Compliance Risks

Delays in fraud flagging and verification breach SBP mandates, risking PKR 50M+ in fines and reputational harm.

SOLUTION

Elevate Every Customer Interaction with Conversational Voice AI That Understands Them

A customer-first conversational voice AI agent that speaks their language, anticipates their needs, and resolves issues in seconds—24/7.

Customer Pain Point	Finova's Solution
Long Hold Times & Frustration	Awaaz resolves 70% of queries in less than 2 mins
Language Barriers & Misunderstandings	Awaaz chats fluently in Urdu, English & Pakistani dialects, so every customer feels heard
Limited Support Hours & Inconsistent Service	Awaaz never clocks out—delivering smart, context-driven support 24/7

Key Capabilities

1 Human-Like Empathy & Personalization

2 Real-Time Problem Solving

3 Adaptive Intelligence

4 Trust-Building Communication

5 Conflict Resolution Expertise

NovaAUTH

Avg PKR 3.5

per OTP cost

50–80%

Increase in OTP value

PKR 100M+

monthly in OTP costs

01

OTP Costs Are Skyrocketing

With tens of millions of OTPs sent monthly at average PKR 3.5 each, NBP faces a rapidly compounding cost burden that threatens scalability.

02

OTPs Offer Weak Security

Even at high cost, OTPs fail to protect against modern fraud tactics.

03

Limited Delivery & Accessibility

Weak networks and device limitations make OTPs unreliable and frustrating.

04

Poor User Experience Hurts Retention

Delays and delivery failures lead to user frustration and abandoned flows.

SOLUTION

Secure Every Transaction with Seamless, Biometric Multi-Factor Authentication—No OTPs Needed

A fast, fraud-proof authentication layer that uses facial recognition and biometric passkeys instead of OTPs. NovaAUTH is tamper-proof, user-friendly, and built specifically for the needs and regulations of Pakistan's digital financial sector.

Customer Pain Point	Finova's Solution
Rising OTP Costs & Poor Scalability	NovaAUTH eliminates per-message OTP fees—cutting monthly authentication costs by up to 90%
Insecure & Vulnerable to Fraud	Biometric MFA with blockchain-logged access—resistant to phishing, SIM-swapping, and OTP scams
Regulatory Complexity & Compliance Risk	NovaAUTH is fully aligned with SBP mandates and built for local financial institutions

Key Capabilities

Frictionless Login

No OTP Failures or Delays

Instant Onboarding & Reuse

Multi-Channel Integration

Adaptive & Intelligent

More Secure

AI Powered CRM

PKR 20–40M

Lost yearly due to missed follow-ups

68%

Leads that never receive a second contact

5X HIGHER

Conversions for automated follow-up teams

01

Missed Follow-Up Opportunities

Most leads go cold due to delayed or inconsistent outreach, causing preventable revenue loss.

02

Manual Tracking Causes Drop-Off

Sales teams rely on spreadsheets or scattered tools, resulting in missed tasks and forgotten conversations.

03

No Insight Into Lead Quality

Without scoring, teams spend time on low-value leads and overlook high-intent prospects.

04

Inconsistent Messaging Hurts Conversions

Manually crafted responses vary in tone and timing, reducing trust and impact.

05

Limited Visibility Across the Pipeline

Managers lack clear oversight of bottlenecks, performance, and conversion patterns.

SOLUTION

Increase conversions with an AI-powered CRM that automates follow-ups and prioritizes high-intent leads.

A smart system that simplifies outreach, strengthens engagement, and ensures no lead is ever missed.

Customer Pain Point	Finova's Solution
Missed follow-ups & slow outreach	Automated sequences across email, SMS, and WhatsApp keep leads engaged instantly
No Clarity on Lead Quality	AI-driven scoring highlights high-potential leads for faster closing
Manual Tracking & Inconsistent Outreach	A centralized CRM pipeline automates tasks, reminders, and personalized responses

Key Capabilities

1 Predictive Lead Scoring

2 Automated Follow-Up Engine

3 Pipeline Intelligence

4 Personalized Messaging

5 Real-Time Analytics
Dashboard

SMART ENTERPRISE SYSTEMS

45%

Productivity lost from
fragmented systems

60%

Teams relying on manual
workflows

30%

Higher costs when systems
aren't integrated

01

Disconnected Tools

Teams switch between multiple systems with no unified workflow.

02

Manual Processes

Approvals and daily tasks rely on slow, error-prone steps.

03

Hard to Scale

Off-the-shelf software fails as teams and operations grow.

04

No Real-Time Insight

Leaders lack instant visibility into operations and performance.

05

Rising Software Costs

Multiple tools create duplicate expenses and inefficiencies.

SOLUTION

Streamline operations with tailored enterprise systems that automate workflows and unify business processes.

A secure, modular platform that adapts to each organization and delivers real-time visibility across teams.

Customer Pain Point	Finova's Solution
Fragmented Tools & Repeated Work	Unified enterprise platform with integrated modules
Manual Workflows & Slow Approvals	Automated tasks, routing, and optimized workflows
No Real-Time Operational Insight	Dashboards and data pipelines for live visibility

Key Capabilities

1 Modular ERP Architecture

2 Automation-Ready Workflows

3 Custom Dashboards & Reporting

4 Seamless Integrations

5 Enterprise-Grade Security
& Compliance

Industries We Serve

We support organizations across multiple industries:

Key Sectors:

- Fintech & Digital Payments
- Aviation & MRO
- Retail & FMCG
- Telecommunications
- Government & Public Sector
- Renewable Energy
- Education & Workforce Training
- ML in MedTech

How We Create Impact:

- Streamlining operations through automation
- Enhancing customer experience with AI
- Enabling secure, scalable digital transformation

Tech Stack

CLOUD

AWS, GCP, Azure

AI/ML

TensorFlow, PyTorch,
OpenCV

BACKEND

Node.js, Python,
FastAPI, Django

FRONTEND

React, Next.js, Flutter

DEVOPS

Kubernetes, Terraform,
CI/CD

DATABASES

PostgreSQL, MongoDB,
Redis

WEB3 & BLOCKCHAIN

Golang, Solidity, smart contracts, decentralized
application development

Strengths & Capabilities

We combine deep technical expertise with rapid execution to deliver secure, enterprise-grade digital systems across multiple industries.

Core Strengths:

- Enterprise-grade engineering
- Security-first development
- Proven multi-industry expertise
- Fast turnaround with consistent quality

Specialized Capabilities:

- Multilingual AI & NLP systems
 - Cross-border engineering experience
 - Scalable cloud and DevOps practices
- 

Global Collaborations

Finova collaborates with global engineering teams to deliver impactful digital and AI-driven systems.

MENA Region — AdvanzaTech:

Deploying Awaaz across GCC enterprises through a strategic reseller and integration partnership.

EU — KOBI PY LTD:

Full-stack mobile application designed and engineered with a West African partner team.

USA — Sirius Solutions Global

System development support for healthcare operations serving US-based hospitals.

Saudi Arabia — Address Of Technology

Software development support for secure, cybersecurity-focused digital platforms.

Strategic and Technology Partners

Finova collaborates with industry partners through formal MOUs to co-develop intelligent systems that modernize operations and drive measurable efficiency.

Al Shukr Dairy Farm:

ERP platform with AI and machine-learning features for operational optimization.

Sirius Solutions Global:

Pipeline and process automation system for medical billing operations serving US hospitals.

Strategic and Technology Partners (Contd.)

Telecom Foundation:

AI-driven educational game for personalized learning, process automation, and student performance scoring.

Fatima Hospital:

Healthcare digitization including online appointment systems and HR operations automation.

Skyscrapers:

Digital optimization of Sweet Homes platforms and online sponsorship systems with fintech integration.

Address Of Technology:

Cybersecurity-focused software development support for enterprise and regional digital platforms.
